

Free Chlorine / Chlorine Dioxide / Dissolved Ozone Transmitter

Chlorine Transmitter in NEMA 4X Enclosure with 4-20 mA Output

Item Number: CL3630X

- Simple to operate
- Display 4-20 mA readout
- Isolated 4-20 mA output suitable for data acquisition, proportional control, and others
- Selectable scale: 0-1.999, 0-19.99, 0-1999 ppm(mg/l)
- Automatic Temperature Compensation
- NEMA 4X Enclosure

Potentiostatic probe uses amperometric principle to measure total concentration of oxidizer such as Free Chlorine, Chlorine Dioxide, or Dissolved Ozone.

Specification

Input	3 Wire potentiostatic (Measures Free Chlorine, Chlorine Dioxide, and Dissolved Ozone)
Output	4-20 mA Isolated
Range	0-1.999, 0-19.9, 0-1999 Selectable
Temperature Compensation	Manual or Automatic
Operating Temperature	0-50°C
Power Supply	110 VAC
Mounting	Wall Mount
