

Portable USB Datalogger

Pulse Recorder Series

Item Number: DL-USB-4

- 4-20mA Current Loop USB Data Logger
- Configuration software
- Selectable alarm thresholds
- LEDs indicate logger status
- 32,000 reading memory

This data logger measures and stores up to 32,000 current loop readings over flashing red and green LEDs. The data logger features a pair of screw terminals and is supplied complete with a 4-20mA d.c. measurement range. The user can easily set up the logging rate and start time, and download the stored data by plugging the module straight into a PC's USB port and running the purpose designed software under Windows 98, 2000 or XP. The data can then be graphed, printed and exported to other applications. The data logger is supplied complete with a long-life lithium battery. Correct functioning of the unit is indicated by set of measurement leads terminating in crocodile clips.

Specification

Model	DL-USB-4
Range	4 to 20 mA
Accuracy	±1
Logging Rate	Min: Every 1 second Max: Every 12 hours
